

Metalock Denmark Changes Name to MAN PrimeServ On-site Recovery

Integrates fully into MAN PrimeServ organisation

Copenhagen,
29/06/2017

Metalock Denmark, the global specialist in field-machining within the marine, wind and industry segments, has changed its name to MAN PrimeServ On-site Recovery, becoming a full member of MAN PrimeServ, MAN Diesel & Turbo's after-sales division. MAN Diesel & Turbo took over Metalock in 2008, since when it has continued to provide in-situ machining services globally from its base in Copenhagen.

Per Rud, Head of PrimeServ Diesel, said: "This is a strategic move on our part. We have long felt that there were advantages to bringing MAN PrimeServ On-site Recovery – with its unique capabilities – into the PrimeServ fold, essentially eliminating any gap between its customers and the PrimeServ organisation. I welcome MAN PrimeServ On-site Recovery and am confident that this move will be beneficial for the now-expanded PrimeServ family and customers alike"

Stig Holm, Head of MAN PrimeServ On-site Recovery, said: "Our integration into the MAN family offers a greater synergy to our customers with the easier access to global on-site support that belonging to the PrimeServ network entails. With this move, MAN PrimeServ now supports all customers looking for partners that offer all-in-one support for in-situ machining within our key segments with an increased focus on the marine segment and up-tower repair for the wind industry. Essentially, MAN PrimeServ On-site Recovery's mission remains the same as always: to minimise the downtime of our customers' equipment."

About MAN PrimeServ On-site Recovery

Established in 1952, Metalock Denmark was acquired by MAN Diesel & Turbo in 2008. As MAN PrimeServ On-site Recovery, it offers innovative, on-site-machining repairs worldwide within the marine, offshore and industry segments both for MAN Diesel & Turbo and all other diesel-engine brands.

MAN PrimeServ On-site Recovery's headquarters are located in the outskirts of Copenhagen. It maintains an international presence through the global MAN PrimeServ network of after-sales workshops.

About MAN Diesel & Turbo

MAN Diesel & Turbo SE, based in Augsburg, Germany, is the world's leading provider of large-bore diesel and gas engines and turbomachinery. The company employs around 15,000 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, India and China. The company's product portfolio includes two-stroke and four-stroke engines for marine and stationary applications, turbochargers and propellers as well as gas and steam turbines, compressors and chemical reactors. The range of services and supplies is rounded off by complete solutions like ship propulsion systems, engine-based power plants and turbomachinery trains for the oil & gas as well as the process industries. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand.
